
Experiment: 01

Name: Atharva Paliwal

Date: 18/07/2021

Aim: Install VM, Load Ubuntu and execute a C Program

C Program:

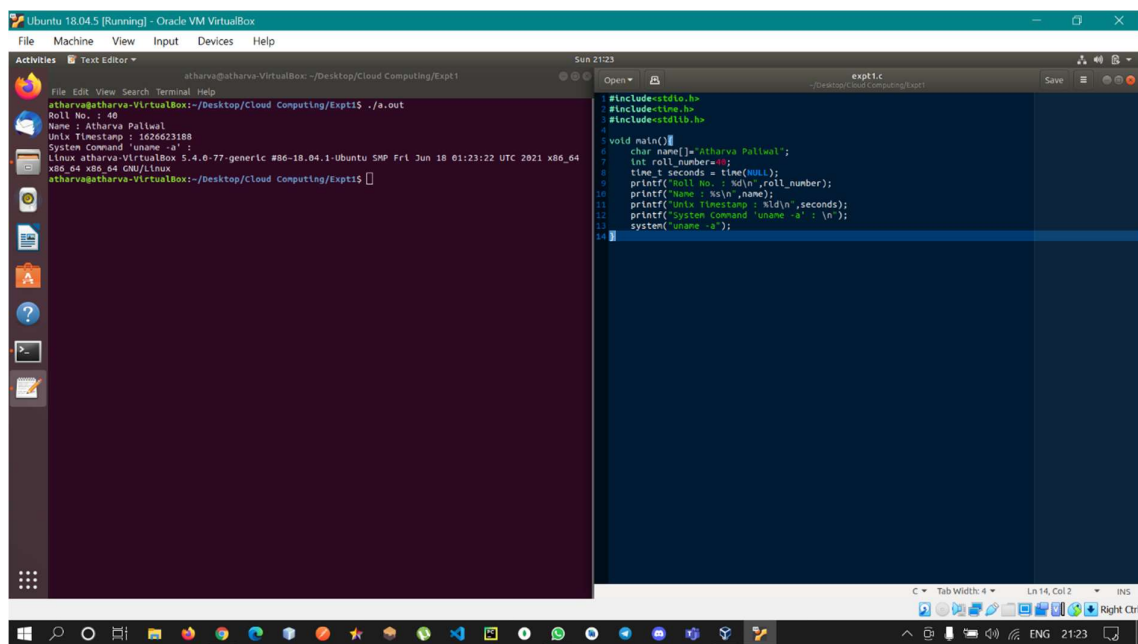

```
#include<stdio.h>
#include<time.h>
#include<stdlib.h>

void main(){
    char name[] = "Atharva Paliwal";
    int roll_number=40;
    time_t seconds = time(NULL);
    printf("Roll No. : %d\n",roll_number);
    printf("Name : %s\n",name);
    printf("Unix Timestamp : %ld\n",seconds);
    printf("System Command 'uname -a' : \n");
    system("uname -a");
}
```

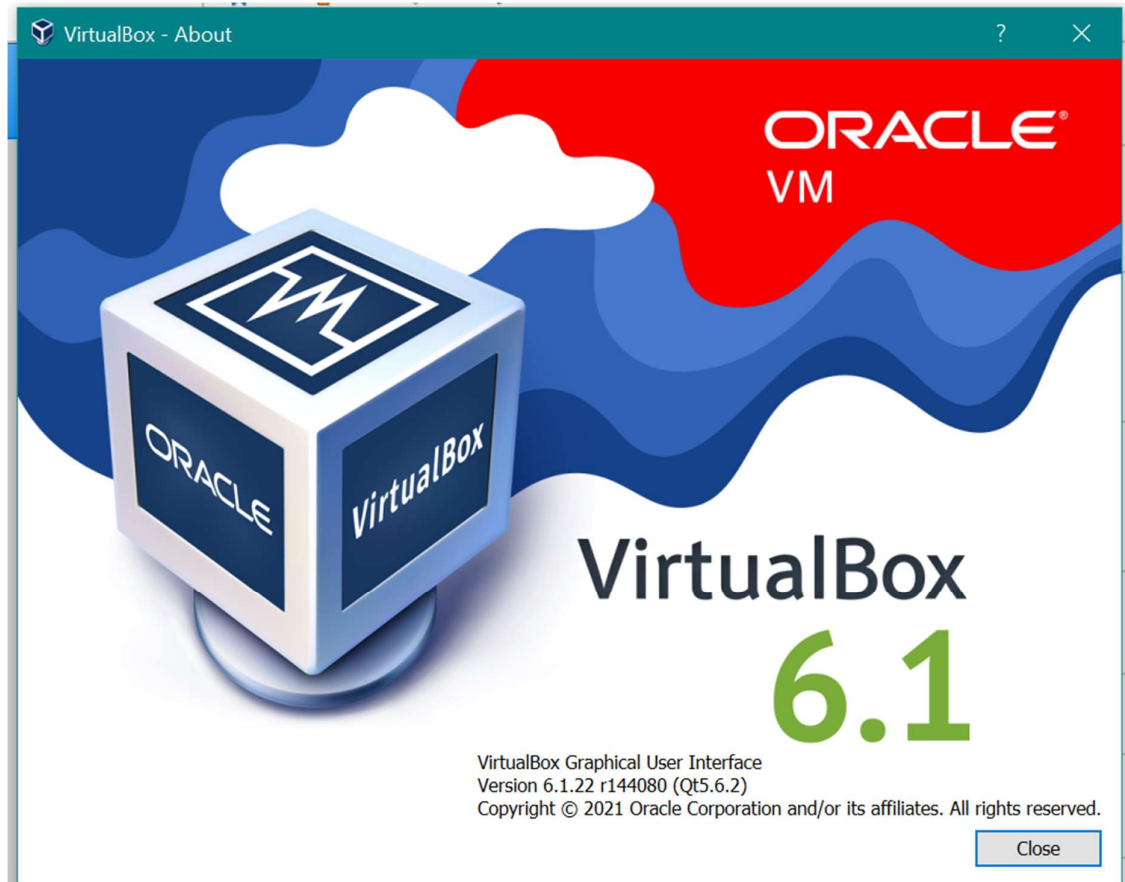

Screenshots

1. Take a screenshot of the whole screen. It should show:

- Taskbar of Host OS
- Complete screen
- Output of the C Program
- Date and time of the guest OS

2. Take a screenshot of the 'About' of Oracle VirtualBox

*** END ***
